

TC CUE

TC CUE is a small alternative for simple show control application
 Where a show control software is not necessary
 To play part of Time Code at daily times

Settings select your Time Code device

The screenshot shows the main interface of the TC CUE software. At the top is a table of cues with columns for 'enabled', 'cue', 'time', 'daily' (with a day-of-week selector), 'TC start', 'TC end', 'loop', 'Force start', and 'Delete'. Below the table are several control windows: 'log window' (showing system logs), 'computer clock window' (displaying 'computer time 12:49:55'), 'emergency stop button window' (with a red 'STOP TC' button), and 'tc display window' (displaying 'TC 00:00:00-00'). A red arrow points to an 'add new task' button in the bottom right corner.

Remove a CUE
 Start TC for test
 Add a CUE
